Huazhong Agricultural University Wuhan, PR China  
Thesis Title; “Regulation and Mechanism of AMH on Sertoli Cells and Follicular Development”
- MSc (Hons) (2007) Animal Reproduction  
Sindh Agricultural University, Tandojam, Pakistan  
Thesis Title “Freezability of Kundhi Buffalo Bull Semen,”

## CARRIER PROFILE

After completion of Doctor of Veterinary Medicine (DVM) degree, I got M. Sc (Hons) degree from Sindh Agriculture University Tandojam during 2007 under the supervision of Professor Dr. Uris Samo, I joined the National Rural Support Program, Islamabad and University of Agriculture Peshawar for a period of about one and a half year respectively. Then I worked at the provincial Livestock Department of Khyber Pakhtunkhwa as Veterinary Officer (Health) for three years. During this period of about five years I got an opportunity to understand the issues faced by the small poor farmers, and educated the emerging entrepreneurs across livestock value chain. At the same time I established my own clinic to utilize my knowledge of Theriogenology / management, and introduced good clinical practices focused at improving the breed, animal fertility and disease resistance through appropriate reproductive management. During 2011, I joined the University of Agriculture Peshawar as regular Lecturer in the College of Veterinary

Sciences. I taught reproductive physiology, gynecology and obstetrics, and reproductive biotechnology. Semen cryopreservation was my major area including the post thaw quality parameters to improve conception rate in bovine and buffalo. Besides, I also worked on the optimization of estrus synchronization and pregnancy diagnosis by using ultrasonography in local goats. During this period, I moved to Huazhong Agricultural University Wuhan, PR China for Doctorate. My research focused on the role of Anti-Müllerian hormone in the sertoli/sperm cells, and finding of genomic and proteomic in granulosa cells. During that period I was trained in molecular techniques: cell culture of sertoli cells/granulosa cells/ CHO cells, use and construction of shRNA plasmid, siRNA, RNA/DNA extraction, proliferation, apoptosis, IHC, ICC, RT-PCR, RT-qPCR and western blotting.
